RepOSS Administration Procedures

March 8-9, 2012
NEA OSS PF WG3 Japan MB

Repository Information Management (1)

■Information Management

- ■ Contents Framework changes must be agreed among the WG3 mailing list by majority voting.

- ■ Each Item into RepOSS would be revised and updated by the WG3 members: China MB, Japan MB, and Korea MB

- ■ The RepOSS site maintenance should be taken care of by Japan MB for the time being.

Repository Information Management (2)

- **Feedbacks from end users will be received and discussed among the WG3 mailing list.**

  - Supportive advices will be logged and published with the comments from WG3, which show whether or not it will be accepted.

  - End users are able to send the RepOSS data in the Excel sheets, which would be reflected by WG3 after checking its contents.

  - Problems and issues will be notified by the WG3 email list from the WG3 members and end users. However, the RepOSS program will be independently improved as the one of sourceforge.net projects.

News for End users

- **Periodically updates and revised information will be posted onto the RepOSS web site.**

  - Contents updates
  - Serious Problems with the RepOSS system
  - Other valuable or important information for end users

RepOSS program management

■Source code management

- ■Source code is registered into SourceForge.net

■Source code updates

- ■Be able to be shared information among the sourceforge.net developer mailing list for RepOSS programs.

■Source code maintenance

- ■Source code updates procedures will be still under consideration. Considering activities after publishing source code, we would like discuss this issue including BTS and so on

RepOSS contents administration procedure details
